                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 4, Application US/08446926A

Patent No. 556786

GENERAL INFORMATION:
APPLICAMY: Croce, Carlo M.
TITLE OF INVENTION: METHODS OF IDENTIFYING SOLID TUMORS WITH
TITLE OF INVENTION: CHROMOSOME ABNORMALITIES IN THE ALL-1 REGION
TITLE OF INVENTION: AND DIAGNOSTIC KITS FOR PERFORMING SAME
NUMBER OF SEQUENCES:
CORRESPONDENCE ADDRESS:
ADDRESSEE: Woodcock, Washburn, Kurtz, Mackiewicz & No. 5567586ris

Patent No. 5845900
GENERAL INFERATION:
APPLICANT: Moelling, Karin
TITLE OF INVENTION: Inhibition Of Viruses By Antisense
TITLE OF INVENTION: Oligomers Capable Of Binding To Polypurine-Rich Tract Of Single
TITLE OF INVENTION: Stranded RNA OF RNA-DNA Hybrids
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                    ö
